

Contact Lens Medical Management Agreement

Contact Lenses are medical devices that require thorough testing to ensure accuracy and safety. **Each year, a contact lens exam is required by law to keep your contact lens prescription current.** After your initial Visual Assessment and Ocular Health Exam, the Doctor can discuss contact lens options with you. The medical management evaluation includes, corneal evaluation and tear film analysis, evaluation of the lenses on your eyes to ensure good ocular health as well as optimal vision, follow-up visits if necessary to ensure continued success, and corneal topographical mapping.

Management levels are determined based on the complexity of the evaluation, the prescription, and number of potential follow-up visits. Upon completion of the fitting, the contact lens prescription will be released to the patient allowing them to purchase a one year supply.

LEVEL 1 Spherical Contact Lenses Contact Lens Services	
Established contact lens patient within the practice	\$95
New contact lens patient to the practice	\$125
LEVEL 2 Toric, Monovision, or Multi-focal Contact Lens Services	
Established contact lens patient within the practice	\$130
New contact lens patient to the practice	\$165
LEVEL 3 RGP, Hybrid, or Specialty Contact Lens Services	
Established contact lens patient within the practice	\$230
New contact lens patient to the practice	\$260
New Contact Lens Insertion and Removal Training	\$30

I understand that the fitting fee does not include the cost of the lenses, and that lens supplies are ordered separately. Contact lens prescriptions will only be released after the initial evaluation period is successfully completed and all fees are paid. This includes the examination, fitting, and follow-up visits if the doctor deems necessary. I am aware of the alternatives for the correction of my vision other than contact lenses. Even with proper care there are risks to wearing contact lenses, which include but are not limited to: irritation from solutions or protein build-up, conjunctivitis, corneal neovascularization, and potentially blinding corneal infections. I agree to remove my lenses at the first sign of problems, and to call the office immediately if I develop unusual pain or redness. Overnight wear is a personal decision, and I understand that sleeping in contact lenses will greatly increase my risk of complications. Wearing lenses longer than the recommended replacement schedule also increases risks of complications.

GUARANTEED SUCCESS POLICY: Most patients are able to wear contact lenses successfully, but a successful fit and wearing experience cannot be 100% guaranteed. The usual and customary fees for the professional services and fitting can't be refunded once the fitting is started. Refunds on the cost of the lenses must be done through the place of purchase, provided that the lenses are returned in wearable condition (soft lenses must be in the original sealed box) and are covered under the manufacturer's warranty policy.
