Optomap Retinal Exam $45 copay

Our doctors order this crucial test as part of your comprehensive eye exam. This advanced technology allows instant viewing of the retina and optic nerve in great detail, which provides the doctors with the most ideal method to detect early signs of retinal disorders (including but not limited to: glaucoma, cancer, diabetic retinopathy, high blood pressure, macular degeneration, and retinal detachment). By performing this test, the doctors will likely not need to dilate your eyes unless the test reveals undetected eye disease. It is particularly helpful when you return in future years as it provides a permanent record of your retina. Each subsequent year the OPTOMAP images can be compared to discover subtle changes and monitor your continuing eye health.
